Plastic is destroying our marine life like never before. SEAQUAL INITIATIVE in collaboration with NGOs, fishermen and local communities, is helping to clean our oceans of Marine Litter. This SeaTowel is made with SEAQUAL® YARN containing Upcycled Marine Plastic and supports SEAQUALINITIATIVE. This combination of Upcycled Marine Plastic with recycled cotton makes these beautiful 100% recycled towels. [www.seatowel.eu](http://www.seatowel.eu)

### Ocean clean wash

We donate 5% of the profit to the Plastic soup foundation (PSF). The PSF wants to reduce the amount of microplastics in the sea and you can help. With small changes in your washing habits you can reduce the numbers of fibers you shed. Fill up your washing machine to the max and dry spin on low revs. Use washing liquid instead of powder and use fabric softener. Wash at low temperature and avoid long washing. [www.oceancleanwash.org](http://www.oceancleanwash.org)

Fisherman collect plastic they catch during fishing

We select PET bottles to recycle

The PET bottles are being converted into small PET chips

We turn the PET chips into new RPET yarn

At the weaving phase the RPET is mixed with recycled cotton

We do not dye the fabric to save water and energy completing an eco friendly process

\* Hangtag from 1.000 pieces in custom color

## BottleBag Fashion

The BottleBag Fashion was developed to draw the attention of the fashion industry. Especially in this industry the single use of polyester fabrics by large corporations like large fashion multinationals are a common fact. Their clothing is not durable: merely a trend for some months. BottleBag Fashion can also be printed in full colour. If you provide a photo we can print it on the BottleBag Fashion by sublimation technique. Even the handles can be printed. The BottleBag Fashion is made out of strong 300D rPET polyester fibre and is made out of eight PET bottles. It's possible to print the bag in one colour, PMS, all over print or full colour sublimation. The BottleBag Fashion contains two handles at the top making it easy to carry around the shoulder. The size of the bag is 40 x 54 cm and the weight of the bag is 95 grams.

# A BETTER CARBON FOOTPRINT

50% recycled cotton, 45% recycled PET, 5% elastane  
0% paint, bleach or other chemicals
